Welcome to 4 Paws Kilo Club!

Many of the pets we see have a problem with their weight. In Australia 45% of dogs, & 40% of cats are overweight or obese. They are so good at giving us 'the look' that encourages us to over feed them.

But don't despair, as Orange Vet Hospital can now help! Club entry is FREE with Hills Metabolic Diet purchase.

Our 4 Paws Kilo Club has been developed in conjunction with Hills Prescription Diet Pet Food.

OBESITY AFFECTS MORE THAN JUST YOUR PET'S FIGURE, IT ALSO AFFECTS THEIR FUTURE!

A pet being overweight carries many risks such as;

- **ARTHRITIS**
- **HEART DISEASE**
- **BREATHING DIFFICULTIES**
- **LIVER DISEASE**
- **EXERCISE INTOLERANCE**
- **DIABETES**

So Why Might My Pet Be Over Weight?

The most common cause of weight gain is over-feeding.

FOOD	QUANTITY	ENERGY INTAKE (kcal)	DAILY ENERGY INTAKE EXCESS*	EQUIVALENT IN DOUGHNUTS FOR HUMANS**
Rawhide bone	190 g	699 kcal	67%	x 7
Dried pig ear	50 g	216 kcal	21%	x 2
Cheddar cheese	60 g	242 kcal	23%	x 2
Dried Meat	65 g	216 kcal	21%	x 2
Tuna in oil	178 g	331 kcal	32%	x 3
Muffin	110 g	330 kcal	32%	x 3
Ham	100 g	164 kcal	16%	x 2
Sausage	56 g	130 kcal	13%	x 1
